EXPERIENCE

Cubet Technolabs pvt. ltd, Infopark — Software Engineer

February 2018 - PRESENT

Experience in design and development of pixel-perfect, buttery smooth UIs across multiple mobile Platforms with React-Native/Redux.

EDUCATION

Amal Jyothi College of Engineering, Kanjirappally — B.Tech (2013-2017)

Mahatma Gandhi University - 60% (with 2 pending back-logs)

St.Antony's Public School & Junior College, Kanjirappally — 12th

AISSCE 2013 with 67%

St.Antony's Public School & Junior College, Kanjirappally — 10th

AISSE 2011 with 8.0 CGPA

PROJECTS

iNTELLi- Anonymous crime reporting

react-native-firebase | react-native maps super cluster
| react-native-geolocation | react-navigation | nativebase | crypto-js |
js-sha-256 | react-native keychain

[iNTELLi](#) is a global safety reporting app powered by the people. It provides a platform for the general public to anonymously report crime Intels from the community. People can avail public safety reports directly from the community, anywhere they travel. They are also rewarded for their submissions securely without compromising their identity in the form of crypto currencies. Phase 4 of this project is ongoing and will be released very soon.

SKILLS

Ability to write well-documented Javascript codes.

Rock solid at working with third-party dependencies and debugging dependency conflicts.

Familiarity with native build tools like Xcode & Android Studio.

Experienced in using Firebase SDK, Amazon SNS, Maps SDK, In-app payments.

Experience with versioning tools like Git.

Experience in Software life cycle phases like Requirement Analysis, Implementation and estimating time-lines for the project.

Highlights

National Innovation Challenge 2017 Finalist -
Finalist in TechTop '17 held at IIT Delhi in 2017.

Android and Gadget Enthusiast - Special Invitee in various smartphone launches organised by Huawei Technologies Ltd.

Spicy Horoscope- Weekly Horoscope

react-native-firebase | react-native html view | react-native-iap | react-hooks | nativebase | react navigation

Spicy Horoscope is a subscription based horoscope service that delivers weekly horoscope predictions for the user and his/her partner. It includes in-app payment for subscription service, push notifications for content delivery intimations and web based content rendering controlled from the wordpress dashboard. Project is ongoing and will be released soon.

Partly Jobs - All home services in one place

react-native-firebase | react-native maps | react-native-geolocation | react-redux | redux-saga | react-navigation | nativebase | react-native adyen drop-in

[Partly](#) is a mobile application that connects trusted service providers in Latvia with on-demand job opportunities delivered by the local community. Partly builds a trusted community of members and solves their everyday home tasks with freedom and flexibility. The app delivers an intuitive design with a great User experience to users.

Wolfray 2FA - Additional Layer of Security to Internet facing Web Applications

react-native-firebase | react-redux | redux-saga | react-navigation | js-otp | otp-client | sha-1 | react-native-svg | nativebase

Wolfray app(now [SecureAccess](#)) helps protect logins with additional authentication or 2-Factor-Authentication mechanism with Time based-One-OTP(or TOTP) and Push Notifications. 2 Factor Authentication increases the security of user's accounts by minimizing the risk of losing credentials by adding an additional layer of security.

Logically - News powered by AI

react-native-firebase | react-native maps | react-native admob | react-native-geolocation | react-redux | redux-saga | react-navigation | nativebase

[Logically](#) is an AI-powered news app(based in the UK) that lets the users see the news with fresh eyes and get diverse perspectives on the stories they love, fact check suspicious articles to stop fake news, and see how events have unfolded over time. Instead of just reading the news, users can analyse it, scrutinise it and immerse themselves using Logically's advanced AI tools. The team consisted of 4 members and my role was to implement the Admob service for both iOS and android along with UI design for some screens and some major bug fixes.

GENERAL INTERESTS

Photography, Travelling, Reading Tech Blogs, Movies and Listening to Music.

Keohälsa- Exercise app for Bus Drivers

react-native -firebase | react-redux | redux-saga | react-navigation | react-native-video

The job of bus drivers is very unergonomic. Sitting in front of a steering wheel for 7-8 hours a day can have a huge impact on their legs, posture and neck. Besides that, the working hours can be very late too which in turn can cause unhealthy habits such as late night snacking and irregular meals. This [app](#) triggers bus drivers of [Keolis](#) (one of the world leaders in shared mobility in France) to perform short, intensive exercises on the bus itself during their breaks.

iSPANI

react-native -firebase | react-redux | redux-saga | react-navigation

[iSpani](#) app allows users to earn money through completing surveys in the community. The app is implemented using firebase authentication and datastores for handling users and databases. Some personal data from the User is collected and based on location, surveys are shown on the user dashboard. This project was created with an older react native version and I was supposed to convert it to the 0.60 version for Play store compatibility along with some critical blocking issue fixes reported by the end-users.

Workish - Fastest way to new jobs

react-native firebase | react-redux | redux-saga | react-navigation | native base | react-native stripe

[Workish](#) is a job portal app in Sweden with different job categories like Full-time, Part-time, Government Jobs etc. Employers can contact the employee using the chat option after looking on to their profile and hire them. I have done only the UI design part and Critical bug fixes for this project.
